Milan, July 30th 2021 – The Board of Directors of Nexi S.p.A. approved the Group's consolidated financial results as of June 30th 2021.

Following the gradual easing of the restrictions imposed at national level starting from mid-April, 2Q21 transaction volumes (acquiring + issuing) strongly recovered at 116 €B, + 31% vs 2Q20 and -2% vs 2Q19. In particular, 2Q21 Italian Cards accelerated the growth compared to pre-Covid levels while Foreign Cards volumes, although still negative, recovered fast. Looking at the macro consumption categories, Basic consumptions strongly performed with a double-digit growth (+18% vs 2Q20 and +32% vs 2Q19)¹, Discretionary consumptions continued their recovery trend compared to 2019 and, finally, High impact consumptions strongly accelerated (in particular restaurants and bars).

In the first semester E-commerce continued to strongly perform with volumes up +54% vs 1H19 and +15% vs 1H20, net of high impact consumption sectors (i.e. travel/tourism related sectors, restaurants)¹.

¹ Data include International schemes only for Nexi Payments, International and national schemes for MePS. Sales volumes only

Starting from mid-July, acquiring volumes recorded a double-digit growth vs 2019, with all macro-categories growing compared to 2019². Basic consumption category confirmed a double-digit growth (+31% vs 2019), Discretionary consumption category continued the strong recovery (+8% vs 2019) and High impact consumption sector registered a significant recovery (+4% vs 2019). Furthermore, Italian cards volumes (+26% compared to 2019) recorded growth in all sectors.

All the above trends further confirm the signs of acceleration of digital payments in Italy started last year and now clearly visible across sectors.

"The first six months of 2021 were characterized by a significant volume growth and financial performance acceleration, more visible in the second quarter, as well as by continuous progresses in the creation of the Italian PayTech leader in Europe" comments Paolo Bertoluzzo, CEO of the Nexi Group. "The volume acceleration across all sectors highlights not only the consumption recovery, which hopefully means an economic restart in our Country, but also a shift from cash to digital payments. In particular, while basic consumptions continued their accelerated growth, also restaurants, travels and tourism strongly recovered. Furthermore, during this semester, we have strongly been committed in pursuing our journey for creating the leading PayTech in Europe: after the merger with Nets, which became effective on July 1st, we expect to close the merger with SIA in the next few months, once receiving the necessary authorizations from the competent Authorities. Nexi will add an European dimension to its strong Italian roots playing a leading role in a highly competitive and strategic sector both in Italy and Europe".

- **Digital Banking Solutions**, which represented 11% of the Group's total revenues, reported revenues of € 61.5 million, up by 12.6% Y/Y mainly attributable to some specific projects related to banks' M&A, in addition to business initiatives, e.g. Digital Banking and Open Banking, and value added services offered. In particular, € 21 million (4% of Net Revenues) was related to transformation initiatives and projects and extraordinary innovation and € 45 million (8% of Net Revenues) was related to the ordinary innovation of products and services, to the maintenance of high quality services and security and to the POS and ATM purchase. ~€ 82 million Transformation Capex are expected to be completed in the next years, in addition to Ordinary Capex equal to ~8-10% of Net Revenues. Normalized net Interest costs were € 61.1 million in 1H21. Reported interest costs of € 77.7 million were affected by certain non-recurring costs mainly related to the bridge loan facility granted to Nexi in the context of the signing of the binding merger agreements with Nets and to the Nets and SIA debt refinancing, carried out in advance by Nexi during the first semester of 2021.

Transformation costs, below EBITDA, were € 11.1 million in 1H21, down by 58% vs 1H19 and up by € 0.8 million vs 1H20. Non-recurring items (€ 95.3 million in 1H21) include, among others, one-offs costs related to the SIA and Nets M&A transactions (€ 30.2 million) and the integration costs related to the SIA and Nets M&A transactions (€ 13.3 million), as well as the IPO costs sustained by the Financial Sponsors (€ 15.3 million).

For both integrations, the transformation plan is fully operational, with the different workstreams focused on the execution of the planned activities and on the realization of the synergies.
